

PROCUREMENT AUDIT

Content of the Offering:

Challenges: Identify potentials within procurement.

Approach: Workshop to create a plan forward

Outcome: Strategy and actions to create a best-in-class procurement organization.

Challenge for the industry today

Since most businesses spend a significant portion of their operating budget on products and services, even the slightest problem can have a direct impact on profits.

That's where a procurement audit comes in. This is the process of reviewing all the procurement processes to ensure they are accurate, complete and efficient.

Service and Approach

Together with you, we conduct a workshop to identify GAPS between current state and where you aim to be tomorrow according to your overall strategy.

We identify potentials to shape and streamline the procurement practices such as:

- Policy's and Routines
- Make or Buy-decisions
- Category Management
- Supplier Relationship Management
- Supplier Performance
- Cost management

We will assist to prioritize the actions to make you go "fast forward".

Expected Outcome

The outcome is an efficient, proactive and professional Procurement organization that contributes to the company's success.
