Safety & EHS

Safety & EHS

Safety @AFRY equals success stories. We know that a safe culture results in a higher output and better performance. That's why EHS (Environment, Health and SAFETY) is in our DNA.

Our journey started in 1895 with safety inspections of pressurized equipment, and has since then expanded to include all types of industry safety areas.

AFRY's certified specialists/experts and EN & ISO standard developers guide you through the process to ensure a safe equipment or production line.

We support you in the application and fulfilment of relevant regulations, directives and standards on your equipment and working environment.

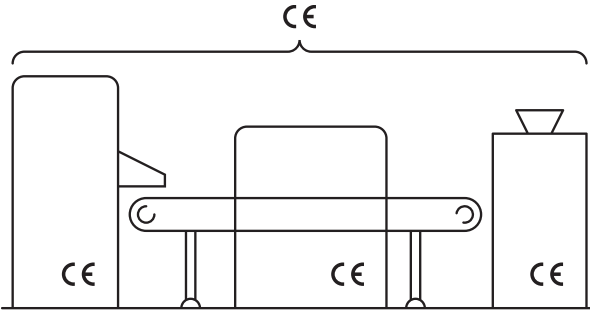

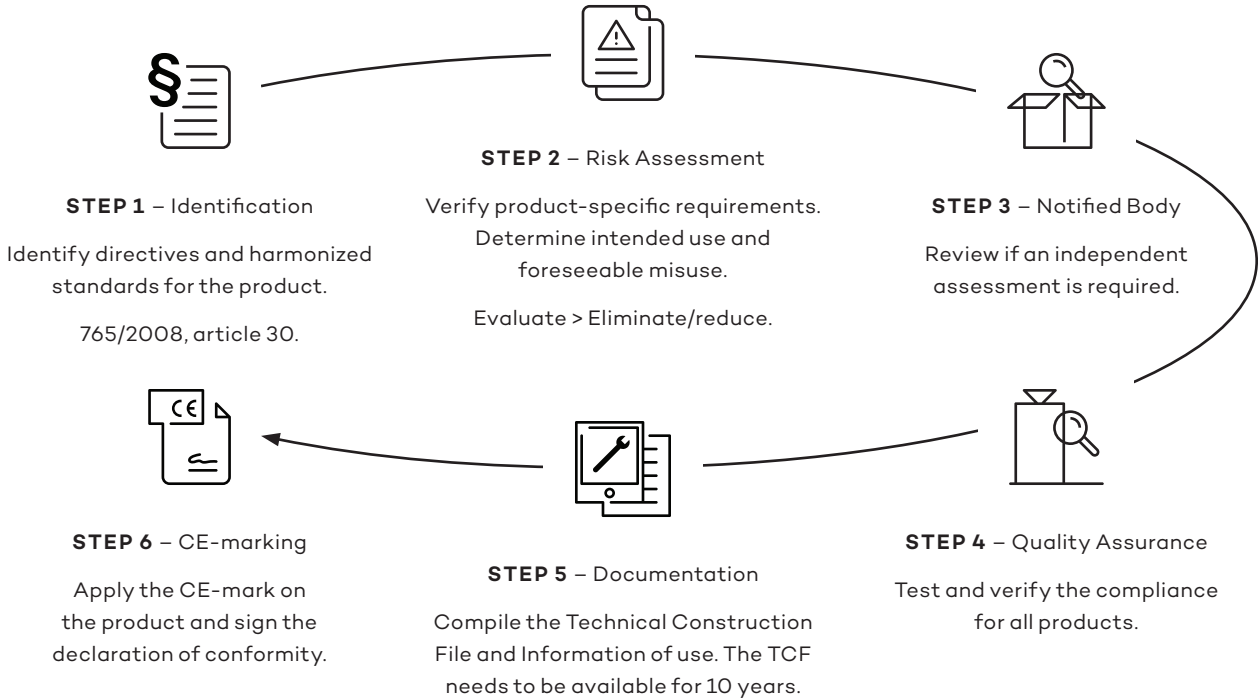

Our ability to analyze and improve your working environment results in a safer culture and a better future.

We manage and support you with ...

- CE-marking
- Machinery Safety & Risk assessment
- Technical Documentation
- Work environment safety
- Training & education
- Construction work environment coordinator, BAS-P & BAS-U

Our own safety products include ...

- 360 Safety PanoTour
- Interactive Safety Layout
- Machinery Safety Layout
- Zert RM, RMp, CLM
- E-learning
- PRS

The entire production line must be CE-marked

Our self-developed and quality assured way of working, that contains the accumulated knowledge and expertise of more than 125 years of safety experience, has been praised by many of our clients.

Our humble and pedagogical approach combined with highly skilled experts leads to understandable, manageable and cost effective safety solutions.

Challenge us to solve or improve your safety issues. Become a part of our safety success stories @AFRY.
