Services

- QMS, Expediting and Supplier assessment
- PQM, Project Quality manager
- QA, Quality Assurance
- QC, Quality Control
- IWE and IWT specialists

Complete QA solution

We offer a complete solution regarding Quality Assurance. At an early stage we set quality criteria together with project management and purchasing. By consider quality assurance milestones already at the contract stage and purchasing process we ensure that correct quality criteria are held and linked to time plan and payment plans.

By performing expediting of suppliers and deliveries we ensure that ordered products are delivered in accordance to specified quality requirements and time schedule.

Our specialists have extensive experience in reviewing quality documentation, perform quality controls and approvals as well as welding and material requirements which is often linked to quality issues and design.

AFRY as Quality Assurance Department in Project Helios

The expansion of SCA Östrand is one of the biggest industrial investments of all time in Sweden. Project Helios has doubled the production of bleached softwood sulphate pulp and comprised eight subprojects.

AFRY was responsible for the quality function of the projects with consultants as: Site Quality Manager (SQM), Quality Assurance (QA) and Quality Control (QC)

The assignment included review of quality documents and recommendations during start-up and implementation. AFRY did the supplier assessment and audit of manufacturing suppliers, situated in Asia and Europe.

During installation AFRY acted assembly inspectors and experts as third party reference to the suppliers reports on deviations from contract, standards and drawings and reported status to the project management. AFRY also monitored quality deficiency costs and supported in warranty issues and reclaims.
