

LOGISTICS ASSESSMENT - RETAIL

Challenge for the industry today

Increasing interest rates and higher “Cost of Money” is driving a higher awareness of Capital tied in Stock and inventory.

The buying power of retail customers has decreased due to higher inflation – putting pressure on company EBITDA.

The impact of man on climate and environment needs to shift to a Sustainable use of resources – in line with World Community Sustainability Goals

Service and Approach.

The AFRY LOGISTICS ASSESSMENT – RETAIL provides a comprehensive assessment and of Logistics for retail companies covering:

- Inbound and Outbound Freight
- Warehouse operations
- Systems

Inbound and Outbound Freight	Warehouse Operations	Systems
Transport Opt.	Base Study	System Check
Packaging Opt.	Data Driven	TMS/WMS/ERP Opt.
	Process Study	
Strategical Development		

Content of the Offering:

Challenges: Higher Interest Rates / “Cost of Money” combined with lower buying power from retail customers and shift to Sustainable resource use.

Approach: Analyse Current Logistics Setup and Optimise OPEX, Capital Tied Up, Service Performance and decreased environmental impact

Outcome: Reduction in OPEX, Tied Capital Cost and Improved service level with Sustainable Logistics Solutions

Expected Outcome

The Logistics Assessment will provide the following benefits:

Inbound and Outbound Freight: Full assessment of the Freight Solution, Optimized Cost and Performance thanks to Updated Freight contracts and packaging solutions. Packaging solutions optimised for Cost, Performance and Sustainability.

Warehouse Operations: Extensive list of possible Short-term “Low Hanging Fruit,” and Mid-term improvement possibilities.

Systems: Identification of potential improvement / increase of system use. Optimisation of system use.

Strategical Development: Defined options for future enhancement of Logistics in Retail - aligned with company objectives.
