ÅF wins extensive assignment from OKG

ÅF has won two new safety assignments at Oskarshamn nuclear power station. The assignments will total approximately 40,000 hours in 2015 and 2016.

The first assignment will involve ÅF working with OKG to conduct a Primary Safety Review of reactor O3.

The second assignment relates to the Periodic Safety Review, in which all three reactors will undergo a comprehensive safety review of all important aspects of safety in accordance with the requirements of the Swedish Act on the Use of Nuclear Technology.

"These assignments are proof of the considerable confidence the customer has in ÅF's comprehensive and broad expertise with regard to maintaining the highest levels of safety at nuclear power plants. In addition, costs will be lower thanks to efficient procedures for project work carried out at ÅF's own offices," says Thomas Nilsson, Business Area Manager, Nuclear Projects, at ÅF, Industry Division.

Corporate Communication
ÅF AB

ÅF is an engineering and consulting company for the energy, industrial and infrastructure markets, creating progress for our clients since 1895. By connecting technologies we provide profitable, innovative and sustainable solutions to shape the future and improve people's lives. Building on our strong base in Europe, our business and clients are found all over the world.
