ÅF extends partnership with Electrolux

ÅF and Electrolux to expand the collaboration on R&D.

Between them, ÅF and Electrolux have unique knowledge in the fields of digitalisation, consumer goods and production. In an expansion of collaboration, ÅF will support Electrolux's Swedish R&D organisation in the area of dishwashers in conjunction with a transfer of this function to Italy.

"We are extremely pleased to be able to deepen our collaboration, meaning that for a period of time ÅF will play a larger role in R&D Dish Care at Electrolux and, through the unique expertise of Electrolux's personnel, our own range of services will be further strengthened. This cooperation fits extremely well with ÅF's new strategy of offering our customers more packaged and turnkey solutions," explains Jonas Gustavsson, President and CEO of ÅF.

ÅF is Sweden's sixth largest R&D employer, with approximately 3,000 staff employed in the sector. R&D projects can be found in all of ÅF's markets; industry, infrastructure and energy.

ÅF is an engineering and design company within the fields of energy, industry and infrastructure. We create sustainable solutions for the next generation through talented people and technology. We are based in Europe and our business and clients are found all over the world.

ÅF – Making Future.
